

The world of Artificial Intelligence

UniWorld.io was made to accelerate the full adoption of Artificial Intelligence (AI) faster than could be done by any single entity. To make the world a better place by eliminating human error and reducing machine faults.

CHAIN

AI & Blockchain

History

From the Stone Age onwards, humanity started to communicate with each other. Step by step this communication changed and grew increasingly more sophisticated. Especially since the computer age, mobile age, and bot age. Scientific progress and communication are interlinked. To advance one is to advance both.

Society 5.0 & UniWorld.io – A New Era

In 2016, Japan Initiated a new technological revolution project called “Smart Society 5.0”. Essentially combining AI and IoT, the concept utilizes the latest technologies to build a “smart city” aimed at streamlining every aspects of everyday city life. Uni, with its core product UniChain, brings scalable Blockchain into the mix.

Uni
UniWorld

The “UniSelf”

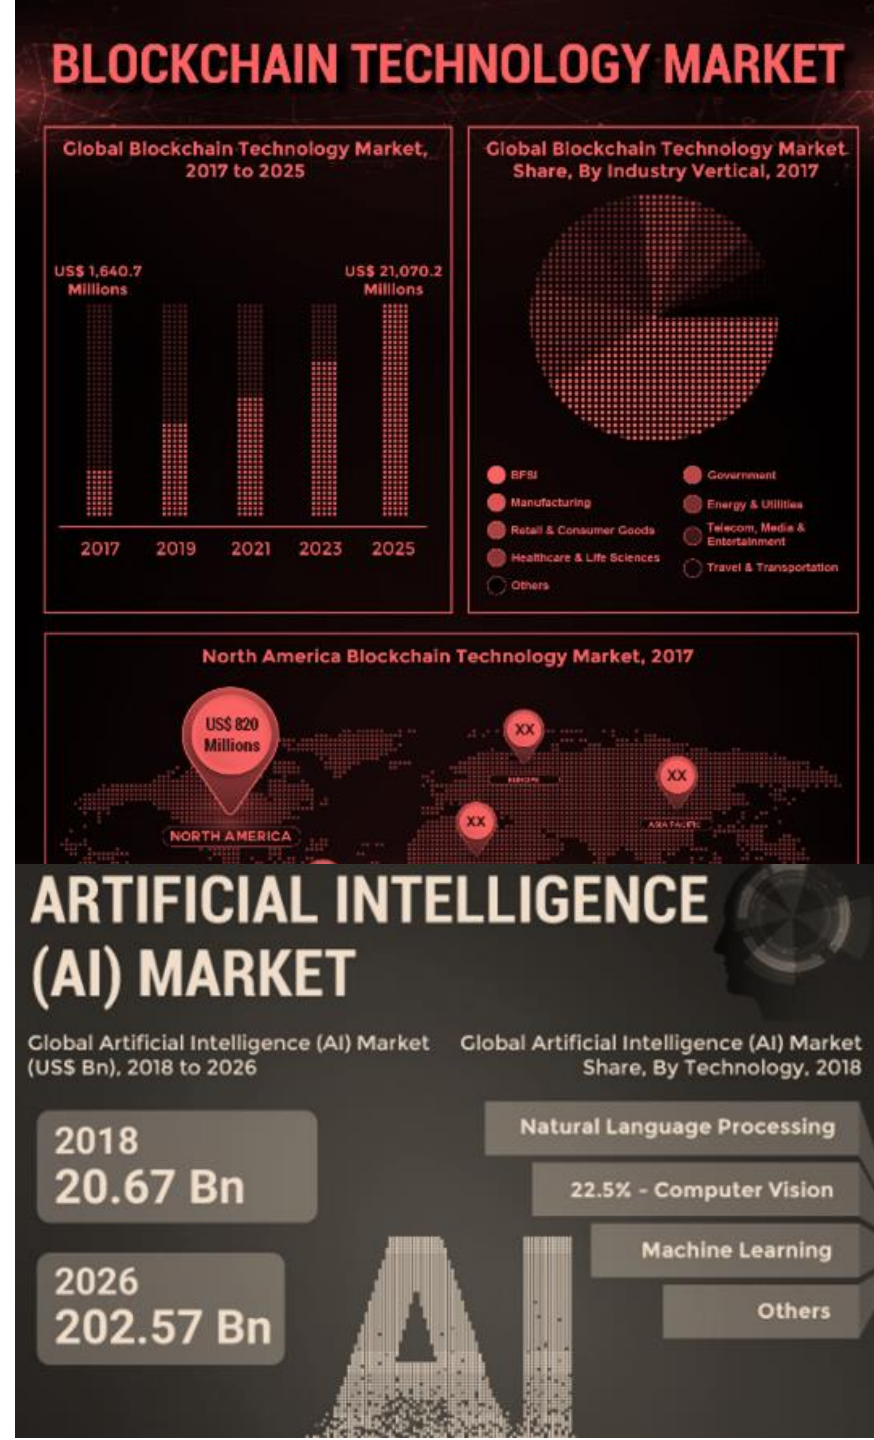

UniWorld.io

Uni isn't just one product, it's an ecosystem consisting of chat bots (UniBot), custom bots (UniMe), a highly scalable, multi-purpose Blockchain (the core product, UniChain mainnet), a multi-purpose social platform (Mia.World) and other applications. Uni is all about execution rather than inventing and simply improves and combines existing technologies like in the case of UniChain (HotStuff + DPoS) with the necessary R&D behind it to reach where others don't. UniLab has been established in 2013 as a part of UniWorld.io (legal UniWorld Inc.) to research and develop smart society tech. With the adoption of Blockchain technology, AI has been brought to new heights. New business concepts were built to fit the new smart society 5.0. A blend of AI, Blockchain and Smart City tailored solutions - that's UniWorld.

AI & Blockchain Market CAGR

The global Blockchain Market was valued at US\$ 1,640.7 Mn in 2017 and is projected to reach 21,070.2 Mn by the end of 2025. A CAGR of 38.4%.

The global Artificial Intelligence (AI) - valued at US\$ 20.67 Bn in 2018 - is projected to reach 202.57 Bn by 2026. A CAGR of 33.1% during the forecast period from 2019 – 2026.

To make the world better requires to do both well and do good. To be simultaneously be economical and profitable. A makeover especially in terms of transparency all over business, education, health care, charity and welfare.

Business

To take Blockchain solutions, which were prior only great on paper, yet rarely execute nearly as well if at, and actualize them.

Innovating business concepts from AI to Blockchain

Providing, developing, but most importantly actualizing technical solutions in the AI & Blockchain market

Society

Improve the environment with tech solutions that are also practical and economical and don't rely on tax welfare

Improve education, healthcare and communal development.

Accelerate social movements for a better world

“
**Re-Evolution For The
Next Generation**
”

AI & Blockchain Synergies

- Intelligence Consensus mechanisms
- Improved Energy consumption
- Increased Scalability
- Further layers of security in applications
- Less privacy issues
- Validating and sharing transactions with high-end encryption
- Specialized hardware components
- Lack of talent -> semi- and full automation of data science
- Data gate grant access and tracks data usage

AI & IoT Synergies

- Increase data efficiency
- Save costs
- Increase security
- On-device computation

**AI CHANGES AND AMPLIFIES
BLOCKCHAIN & IOT**

Blockchain & IoT Synergies

- Secure data better
- Create the right incentive structure
- Create a network of computers

Blockchain Can Change A.i

- Help AI explaining itself (and making us believe it)
- Increase AI effectiveness
- Lower the market barriers to entry
- Reduce catastrophic risks scenario

AI & Blockchain Enabled "Intelligent Economics"

**BLOCKCHAIN ACCELERATES
AND CHANGES AI & IOT**

Community for humans and chat bots with an integrated crypto wallet at
<https://unime.world>

Custom AI based virtual assistants platform for everyone to make and use their own bots including 3D Avatar & Voice Bot
<https://unibot.org>

The next generation of Blockchains, the UC mainnet it can handle millions of transactions per second and acts as foundation to build upon. It also enables interoperability in between other Blockchains
<http://unichain.world>

The cryptocurrency UniWorld UniCash / UNW
<https://explorer.unichain.world>

Also known as Multiple Intelligences Alliance or Society. Social centered around AI and Blockchain.
<https://mia.world>

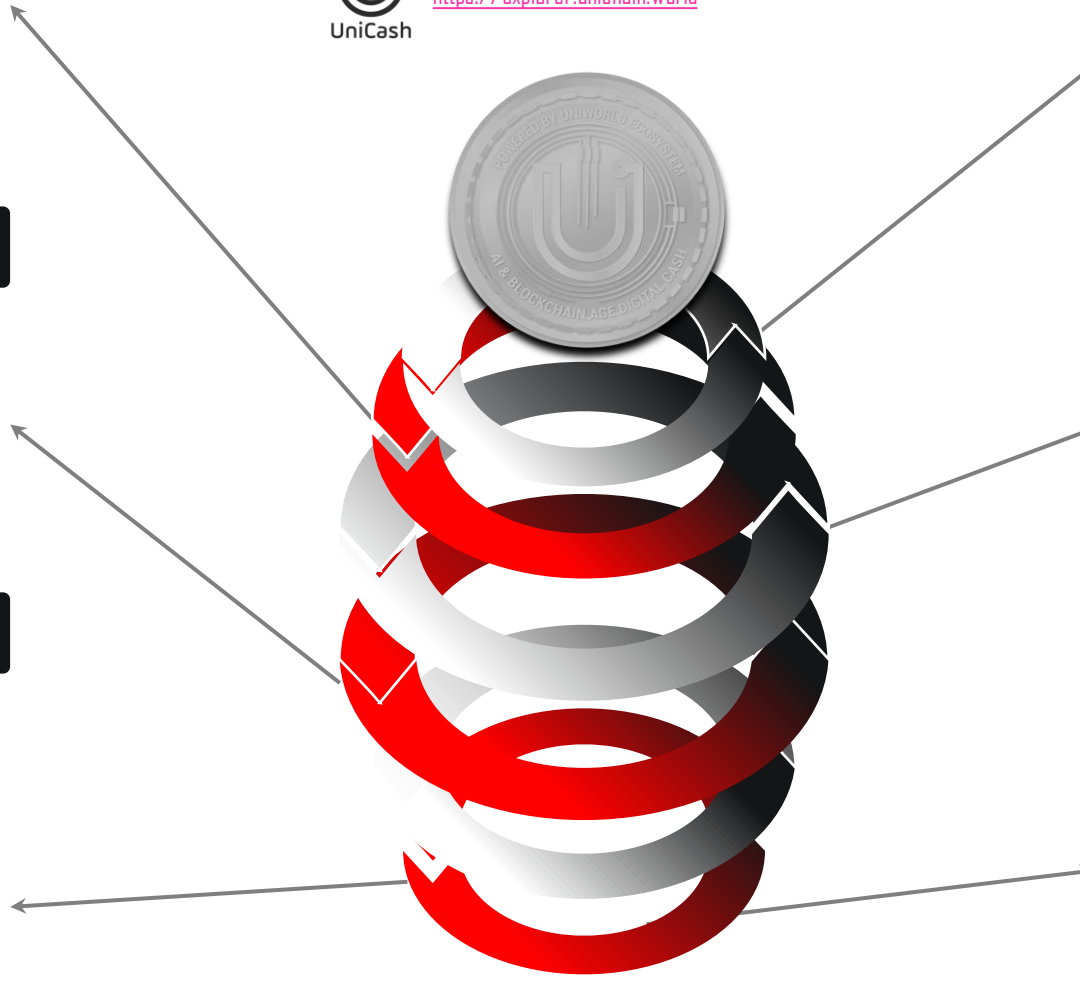

Uni's environmental department. Combines biotechnology and IoT to protect and improve the environment.

(aka. SamuraiLab) Uni's tech talent and R&D department. Operate globally and by DAO principles. <https://support.uniworld.io>

UniCore Account system of Uni's ecosystem
1 sign-up covers all Uni services
<https://accounts.uniworld.io>

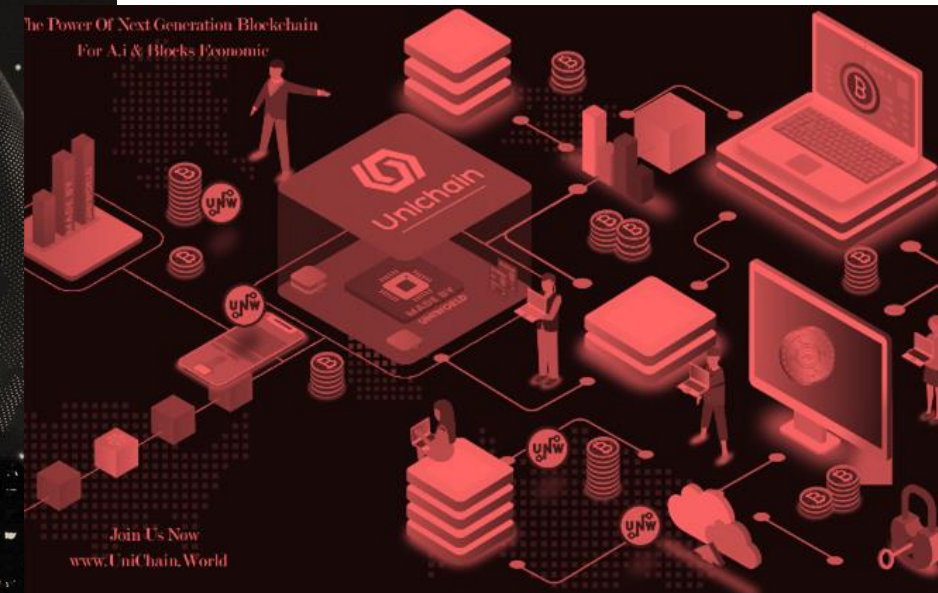

UniChain.world is a blockchain built for- and with AI & Blockchain economics in mind. **UniChain** is also referred to as the 4th generation Blockchains for its prior unseen scalability and interoperability capabilities. **Unichain** uses a **DPOS-HotStuff** consensus algorithm which reduces the computational complexity greatly. A block is finalized within one second.

Furthermore,, **UniChain** was built to support the multiple chain (also called side chain) and support cross chains using what is commonly referred to as the **UniBridge** Protocol.

Your Experts In Next
Generation Blockchain Tech

Unichain Platform Application

Chatbot Industry

Identity stored on the blockchain - verification

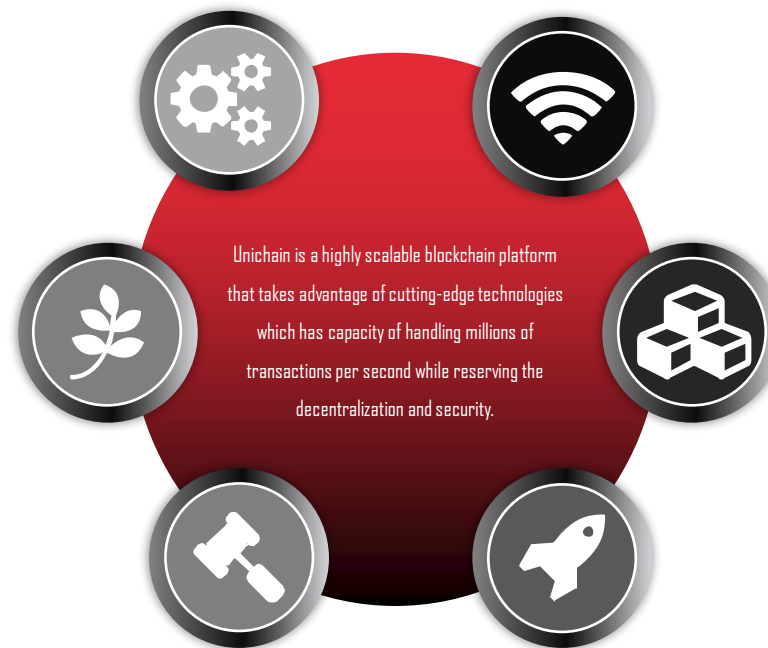

Real Estate

Sharees are stored on the immutable ledger with valid signatures.

Removes high entry barrier. One can own for example as little as 0.001% of a house and earn 0.001% of the rent income and so forth

P2P Lending

Smart contracts (we also have templates) to apply to any kind of p2p lending processes. Saves time, is secure and leads to good interest rates for both sites through win-win communication and cutting administrative costs

BIFS Or Insurance

The UniChain Blockchain and its smart contracts (and template) can be used to build Blockchain based insurances. All processes (claim, settlement, signature etc.) are done automatically and are traceable and unrepeatable.

Supply Chain

Each Company posses a node with their identities. Products and steps are registered. All processes in the supply chain are now transparent, secure, identifiable and traceable.

Digital Identity

I.e. self-sovereign identity. Individuals can possess an encrypted digital hub in which their digital identity data could be stored among other things

UniBot Platform

Create And Manage Virtual Assistants And Chat bots

Your Experts In Intelligent Automation

Unibot is in the bot business. As such, we have been developing and researching a plethora of a automation programs. Our open platform hosts any kind of chat bot for anyone. E.g. *Chat bots, virtual agents, sms bots, email bots, bots on IRC, bots for web and mobile* and so forth.

On Unibot you can build your own personal bots to be your virtual assistant, to semi- or fully automate your social media or email, or in the future even to create a copy of your consciousnesses (sentient AI, in development). Our platform comes fully equipped with our AI engine, our platform scripting languages Self and AIML, and our web, Android, and iOS SDKs.

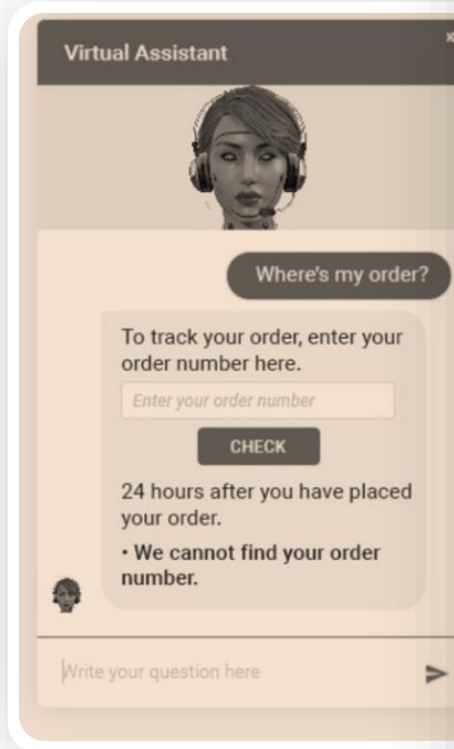

We live at a momentous time in human history. The age of bots., Will you join us, or will you be left behind? unibot.org

Our platform comes fully stacked with anything you might need to adopt bots in your business and equip you well to stay on track for this new age of AI and bots. We can for example add a bot to your website or mobile app to provide instant customer service, automated posts and inquiries for your business presence on social media, automate your email and much more.. We are also experts in cross platform interoperability including *Facebook's, Twitter's, Microsoft's, Apple's, Google's, Telegram's, Slack's, Wechat's, Viber's, Telegram's, Kik's, IBM's, Alexa's, Twilio's, IOT devices or any other databases of a similar kind.*

Create Bots on the UniBot Platform For Business

UniBot Use Case

TELECOM & CABLE
Provide technical assistance, manage service more efficient, process payment via real-time chat

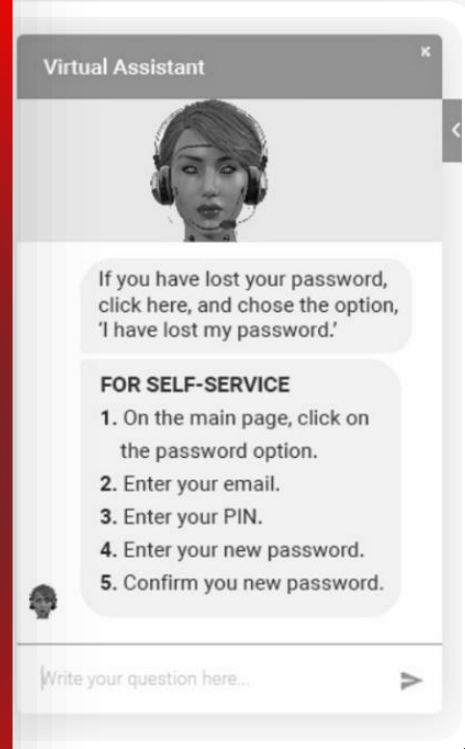

FINANCIAL SERVICES
Customize bots for specific tasks and functions to scale your customer service

E-COMMERCE & RETAIL
Provide information on prices, local storage, featured products, payments, billing [...]

UTILITY
Manage service requests and more using semi- or fully automated scheduling and management tools.

GOVERNMENTAL
Manage information and solution of problem, rules, appointment...

INSURANCE
Automate 80% of repetitive customer inquiries to free-up live agents for complex issues

UniMe Application

UniMe For Connecting People and Bots For Business and Life

UniMe is a communication application with new concepts such as where the hosts and customers communicates with highly trained virtual assistants. The new take is, that the customer does not realize he/she is talking to a bot and that the bots grow increasingly more yet never fully sentient. In other words, UniMe is the bridge connecting people and bots for Business and life that doesn't shy away from going a step further in AI development.

Create & Manage Bots Via UniBot

Allow you to easily manage your bot, manage business statistics and more.

Crypto Wallet Payments

With the highest level of privacy and reliability when being sent, received, or simply stored

Simple – Secure & Reliable Messaging

Voice, Chat or Video calling with state-of the art encryption, free of charge

Unime

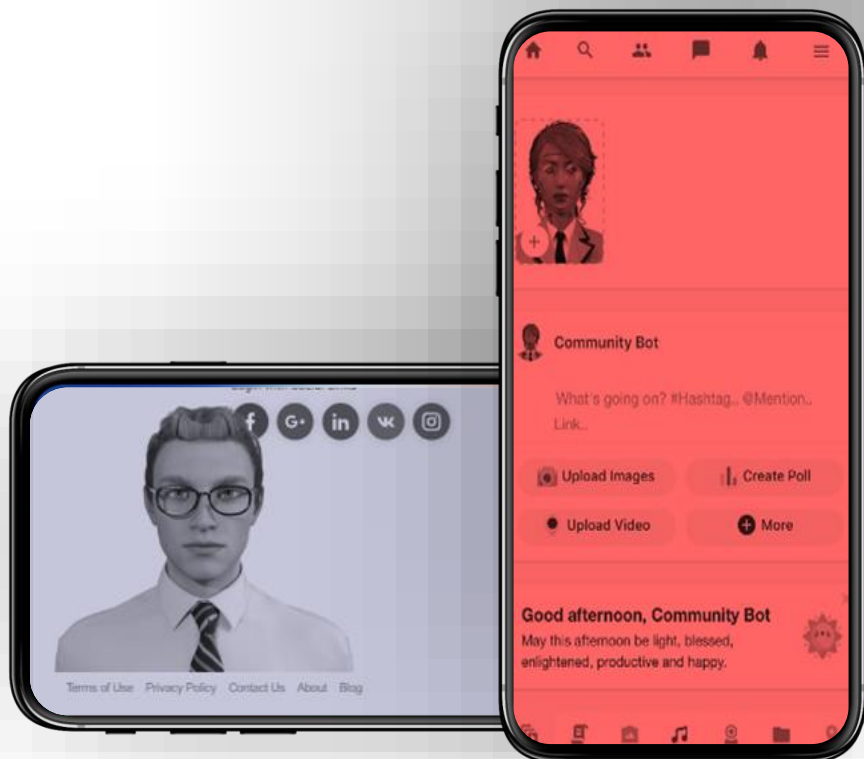

MIA | Multiple Intelligences Alliance

Social Network Focused on AI & Blockchain

mia.world

A technical take on social media that comes with a transparent and decentralized fund on the Blockchain network to overcome and/or reform the health, education, environment, charity and community sector's issues.

Web-App Communities

Full cross-platform web, iOS and android support including any social network

AI & Blockchain Communities

Accelerate adoption and actualization of emerging technology systems

Business Matching

Consulting, connecting, marketing, hosting, private events, meetup and seminars

AI & Bots

Cloud service

Design and integration

For web and mobile

Any platform

Automation: Customer service live chats,
forums, emails,

CRM, marketing, technical support, algorithmic
trading,

fraud detection and many more

Unilab

The talent of our R&D team comes from all over the world and operates in a truly decentralized fashion

R&D/ B2B Tech
services since
2013

Blockchain

Blockchain development services for all industries with focus
on crypto, IoT and smart cities

Crypto wallets and tokens, fiat otc exchange, crypto to crypto
exchange

Dapp, Smart Contracts, Hyperledger, and more

Web-App

Fullstack web app, iOS and android service

UniCash UNW

Interoperable crypto
Blockchain 4.0

UNW Cash itpo.uniworld.io

UNW is the native token of Uni. The Blockchain platform, UniChain, operates with any major cryptocurrency alongside its own and offers both high interoperability and scalability (e.g. 1 million transactions per second) making it a fantastic platform to build upon

Before Q1 2019: Before Q1 2019: Developed high tech products of UniWorld ecosystem such as UniBot, UniMe, Mia, etc.

Q3 2019: Implement Unichain, launch Unichain testnet 11 Sep 2019. Start private sale

From Q2 2020 Re-strategy of expanding by Covid 19. Launching pre-mainnet. Re-new interfaces, exciting features and re-build some functions, apps

Q2 2019: Design Unichain - public blockchain platform from Uniworld ecosystem

Q4 2019: Building Dapp for product from UniWorld. Build bridge protocol to exchange asset from UniWorld to other platforms

End of Q3 – Q4 2020 Listing UNW on exchange, beta Bot Store.
Launching mainnet V1. Upgrade features of UniMe and beta IOS version

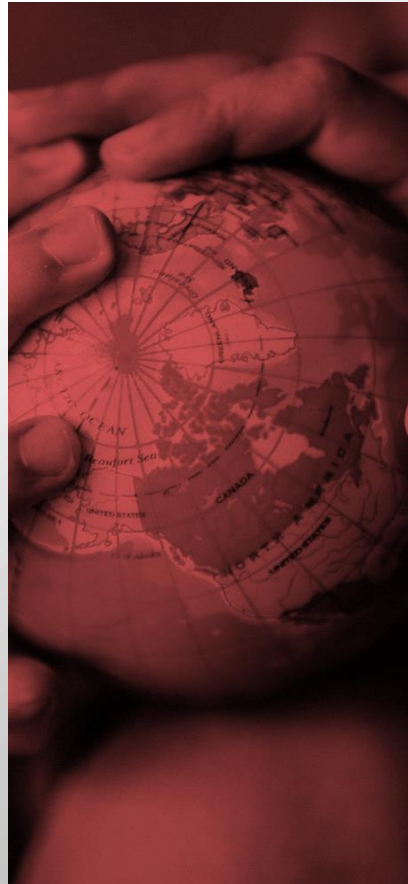

Q2-3 2020 Upgrade mainnetv2, Upgrade focus Dapps, tools for UniChain
Upgrade services Business expansion

Q3- 2020 Pre sale - Public sale, launching Mia apps, launching UniMe android version. Business expansion.

Q1 2020: Re-strategy (depending on Covid). Business expansion. Upgrade features of UniMe, UniChain, UniBot. Mia and others

Q4-End days 2021: Upgrade services Business expansion and others

UniGreen

Partnerships to accelerate environmental programs better and faster than could be done alone.

The organization focuses on the combination of biotechnology and IoT to protect the environment.

PLANET**

**CLEANER GREENER
HEATHIER**

Meet Our Team

Assimilation of Robots into Human Society

Daika Ginza
CEO UniWorld

When he was 21, he started his first business in Tokyo. He has been CEO, CMO and investor in many tech businesses associated centered around Bitcoin. UniWorld.io was founded to take AI and Blockchain to a completely new level by building an ecosystem devoted to the embrace of Society 5.0 and robot assimilation.

Ben Nguyen
CFO

He studied and worked in Singapore, where he graduated with a master's degree in FILL-IN Japan. He manage EVN Finance's fund raising and currently also works as CFO for the FT Consultancy. His favorite sci-fi quote: Digitizing life is to number life

Joey Bertschler
CMO

He is a writer, growth marketer and contributor
He works with Forbes, Bitgrit, UniWorld.io, Digital Asset Live, Hacker Noon, Thrive Global, Blockchain Magazine, and more.

Unilab DAO Network
Technial Team

Unilab has been established in 2013 as a part of UniWorld.io to research and develop smart society tech. With the adoption of Blockchain technology, AI has been brought to new heights. New business concepts were built to fit the new smart society 5.0. A blend of AI, Blockchain and Smart City tailored solutions - that's UniWorld.
